

Ko-ach started as a sole trader status in professional live audio in 1996.

In 2006 Ko-ach became a limited company and started to undertake local government and education contracts.

In 2007 we started to broaden our services by incorporating visual display systems, Ethernet networking and lastly, performance lighting equipment.

Many people have commented that our name, "Ko-ach", is a very unusual name and although it has never really been heard of before, it's a name that sticks in the mind.

Ko-ach is actually a Hebrew word taken from the bible which means power, capacity and ability.
