

We have 2 main types of training services. The first is a custom on site training package which is tailored personally to the client or customer's needs and may come as part of a solution or separately. The packages can be set over any length of time and can address any need.

The second service is our range of on-site webinars which cover a wide range of subjects or needs and provides a fantastic way to take a relatively inexpensive class in the comfort of your own surroundings without the need for traveling. This in turn provides better value for money.

We run a series of classes which are all interactive. You can also view other classmates and ask questions in-session.

Our classes are conducted by some of the most intuitive and charismatic tutors in the industry. Their brand of fun-teaching and engaging sessions make learning fun, easy and very, very rewarding.
